EMERGING DROUGHT-LIKE SITUATION IN DESERT AREAS OF SINDH, PROVINCE

SitRep-II | April 25, 2025

OVERVIEW:

The desert areas of Sindh province, including Tharparkar, Umekrot, Sanghar, and Khairpur Mir's, are facing severe drought-like conditions due to below normal precipitation and exaggerated evaporation. It may potentially affect the human population, livestock-based livelihoods, and food security. Below is the situation of the area, which FRDP, being a humanitarian concern, has prepared for humanitarian actors and communities.

Community Identified Immediate Needs:

District	UCs	Villages with Immediate Needs				
		Food	Water	Fodder for livestock	Health Assistance	Livestock Vaccination

HEALTH SITUATION:

Communities report outbreaks of diarrhea, flu, throat infections, and malaria, with infants particularly vulnerable to respiratory infections. The lack of clean water and malnutrition exacerbate health risks. Tharparkar's 243 villages and Umerkot's 107 villages urgently require mobile health teams to visit, ORS supplies, and mosquito nets. Preventive measures, including water purification tablets and community awareness on hygiene, must be scaled up to curb disease spread.
